EDUCATION

Master of Science, Cybersecurity University of Maryland, Baltimore County	Expected Graduation May 2028 3.50 GPA
Bachelor of Science, Information Systems University of Maryland, Baltimore County	May 2025 3.12 GPA
High School Diploma, Cybersecurity Program of Studies North Point High School for Science, Technology, and Industry	May 2021 4.19 GPA

PROFESSIONAL SUMMARY

Highly motivated and dedicated learner with a solid work ethic, seeking to launch a career with the Department of War. Eager and enthusiastic to learn and grow in a variety of different work experiences, efficiently learning complex material and applying it to hands on tasks and procedures. Excellent communicator with years of experience finding solutions to resolve technical and operational issues of all types. Willing to admit when I don't know something, but will ask questions to find the answer and learn more about the subject to gain a comprehensive understanding of it.

TECHNICAL SKILLS

- Currently preparing for the CompTIA Security+ certification (most recent practice exam: 83%).
- Experience performing network traffic analysis using Wireshark.
- Beginner experience analyzing system logs and security events using Splunk.
- 8 years of exposure to cybersecurity and networking concepts, including common protocols.
- Proficient in Python, SQL, Java, HTML, and CSS; currently learning R.
- Strong working knowledge of Windows operating systems; introductory knowledge of Linux.
- Proficient with Microsoft Office (Word, Excel, PowerPoint).

EXPERIENCE

Cyber Defense Training Camp University of Maryland, College Park	College Park, MD July 2019
○ Conducted penetration testing exercises in a controlled lab environment using Kali Linux. ○ Performed vulnerability scanning and exploitation on networks and endpoints; validated findings and documented results. ○ Placed 2nd in a Capture the Flag (CTF) competition, demonstrating rapid problem-solving under time constraints	
Ford Motor Company - 40 hours/week Service Advisor Assistant	Waldorf, MD January 2026 - Present
○ Collaborated closely with service advisors to efficiently process customer vehicles in a fast-paced environment. ○ Assisted with facility operations and upkeep, providing seamless working environment for service department staff. ○ Provided professional complimentary services directly with customers to increase customer satisfaction.	
Capital Clubhouse Ice Rink – 30 hours/week Front Desk Staff	Waldorf, MD August 2020 – January 2025
○ Managed point-of-sale transactions and equipment rentals while providing customer support. ○ Assisted with facility operations and upkeep, ensuring a safe and organized customer experience.	
Vice President, UMBC Ice Hockey – 5 hours/week University of Maryland, Baltimore County	Baltimore, MD August 2022 – August 2025
○ Lead day-to-day team operations including scheduling, registration/compliance coordination, and equipment management. ○ Serve as liaison between the team and university athletic administration; de-escalate issues and resolve conflicts to maintain program continuity.	

PROJECTS

Home Cyber Lab Environment – 5 hours/week

March 2026 - Present

- Designed and deployed a multi-system virtual home cybersecurity lab with pfSense, Windows server, and Windows/Linux endpoint machines.
- Configured network segmentation, routing, and firewall rules to simulate real-world enterprise network conditions
- Deployed and managed Splunk on a Linux server for centralized log collection, monitoring, and analysis.
- Ingested and analyzed system, network, and security logs to identify anomalies, suspicious behavior, potential threats.
- Conducted controlled testing within the lab environment to evaluate logging visibility, detection capabilities, and system responses.

The Internet Python Project

March 2023

- Designed and constructed a Python program simulating internet functions and connectivity
- Built functions that created interconnected servers with ping, traceroute, and ipconfig abilities
- Utilized recursive functions to create and fill routing tables between all connected servers

Website Building

June 2026 - Present

- Designed a professional portfolio website to showcase accomplishments and projects currently being working on.
- Designing a professional [web app](#) for a local mechanic shop, complete with business information, offered services, reviews, and a service scheduling section. Integrated an SQL database to store customer information and prior service history using Google OAuth Account sign in.
- Utilized an AI chatbot to create a rough version of the desired final website, then utilized Phoenix Code and further AI editing until a final version with every desired feature and function was accomplished.
- Followed common web design principles and site analytics to engage website visitors and drive more traffic to the business.

ACTIVITIES & ACCOMPLISHMENTS

National Honors Societies - National Honor Society, National Technical Honors Society, National Juniors Honors Society, National Society for High School Scholars.

Project Leader: Team America Rocketry Challenge – Lead a team of students of various ages to build a model rocket to compete in a regional competition

Team Leader: International Submarine Races – Lead a team of students of various ages to design, produce, and integrate a drivetrain and propulsion system for a one-person man powered submarine to compete in the ISR Races at NSWC Carderock David Taylor Model Basin
